

Amendments to the Claims

1. (Currently Amended) A method comprising:
~~in response to one of recognition receiving at a user equipment of incoming data~~
as an information entity including data fields; ~~or determining at a user equipment that an~~
~~incoming information entity has been sent by a trusted party;~~
verifying internally at said user equipment on the basis of an identification code
that associates with the user equipment that automatic insertion of information into at least one
of said data fields of said information entity is allowed;
automatically inserting ~~without user interaction~~ transaction information into at
least one data field of the information entity based on information available at the user
equipment; and
transmitting the information entity with said automatically inserted transaction
information from the user equipment over a wireless interface.
2. (Canceled)
3. (Canceled)
4. (Currently Amended) A method as claimed in claim 1-3, wherein the
~~identification code authorization is based on~~ one of the following: personal identity number
(PIN); Subscriber Identity Module (SIM); Number Assignment Module (NAM); Wireless
Application Protocol (WAP) Identity Module (WIM); a unique product code of the user
equipment; or an international mobile subscriber identity (IMSI) code.
- 5-8. (Canceled)
9. (Currently Amended) A method as claimed in claim 1, wherein at least part of
the ~~transaction~~ information ~~to be~~ automatically inserted in the information entity is obtained

from a storage unit provided at the user equipment.

10. (Currently Amended) A method as claimed in claim 1, wherein at least part of the ~~transaction~~ information ~~to be~~ automatically inserted in the information entity is obtained from another information entity available for the user equipment.

11. (Currently Amended) A method as claimed in claim 1, ~~wherein the user gives~~ comprising receiving a confirmation ~~from the user~~ before said ~~step of~~ automatically inserting information in the information entity.

12. (Currently Amended) A method as claimed in claim 1, wherein the information is automatically inserted by a transaction processing unit of the user equipment.

13. (Currently Amended) A method as claimed in claim 1, ~~wherein the user~~ equipment inserts comprising inserting information in a data field of the information entity in a predefined manner.

14. (Currently Amended) A method as claimed in claim 1, ~~wherein~~ comprising filling the information entity ~~is filled~~ in accordance with predefined instructions.

15. (Original) A method as claimed in claim 14, wherein the instructions define the information that is to be inserted in the information entity in response to an event.

16. (Currently Amended) A method as claimed in claim 1, wherein said information entity is ~~transported as a~~ standardized data entity.

17. (Original) A method as claimed in claim 16, wherein said data entity is based on the Electronic Commerce Modelling Language.

18. (Original) A method as claimed in claim 16, wherein said data entity is based on an electronic data card format.

19. (Original) A method as claimed in claim 18, wherein the electronic data card format comprises an electronic business card or an electronic calendar format.

20. (Currently Amended) A method as claimed in claim 1, ~~wherein the user equipment communicates comprising communicating~~ transaction information via an interface that is based on at least one of the following: short message service (SMS); wireless application protocol (WAP); internet protocol (IP); a short range radio link; a proximity card type interface; or an infrared link.

21. (Currently Amended) A method as claimed in claim 20, ~~wherein the user equipment receives comprising receiving~~ the information entity via a first type of interface and returning returns the information entity via a second type of interface.

22. (Original) A method as claimed in claim 1, wherein the user equipment communicates with a base station of a cellular communication network.

23. (Currently Amended) A user equipment comprising:
a receiving unit configured to receive an information entity including data fields;
a verifying unit configured to verify internally at said user equipment on the basis of an identification code that associates with the user equipment that automatic insertion of information into at least one of said data fields of said information entity is allowed;
a processing unit configured to automatically insert without user interaction transaction information available for the processing unit in at least one of said data fields of an said information entity that associates with an electronic transaction; and

a transmitter for transmitting the information entity with said automatically inserted transaction information from the user equipment to a co-operative device over a wireless interface;
~~wherein said processing unit is configured to automatically insert without user interaction the transaction information in response to one of recognition of incoming data as an information entity including data fields or determining that an incoming information entity has been sent by a trusted party.~~

24. (Currently Amended) A user equipment as claimed in claim 23, comprising a storage unit configured to store ~~the transaction~~ information, wherein the processing unit is adapted to fetch information from said storage unit and to insert said information from the storage unit into the information entity.

25. (Previously Presented) A user equipment as claimed in claim 23, wherein the processing unit is adapted to obtain information from at least one other information entity and to insert said information from the at least one other information entity into said information entity that is the subject of the information insertion procedure.

26-29. (Canceled)

30. (Previously Presented) A method according to claim 1, wherein the information entity is a form.

31. (Currently Amended) A method according to claim ~~30-31~~, wherein the form is selected from the group consisting of a billing details form and a shipping details form.

32. (Previously Presented) A user equipment according to claim 23, wherein the information entity is a form.

33. (Previously Presented) A user equipment according to claim 32, wherein the form is selected from the group consisting of a billing details form and a shipping details form.

34. (Canceled)

35. (Canceled)

36. (Currently Amended) A method according to claim 1, wherein the ~~transaction~~ information automatically inserted into the information entity comprises at least one of:

name;

address;

credit card number;

telephone number; or

passport number.

37. (Previously Presented) A user equipment as claimed in claim 23, wherein the ~~transaction~~ information automatically inserted into the information entity comprises at least one of:

name;

address;

credit card number;

telephone number; or

passport number.

38. (Canceled)

39. (New) User equipment as claimed in claim 23, wherein the identification code is one of the following: personal identity number (PIN); Subscriber Identity Module (SIM); Number Assignment Module (NAM); Wireless Application Protocol (WAP) Identity Module

Appl. No.: 10/083,169
Amdt. dated 05/15/2008
Reply to Office Action of 11/15/2007

(WIM); a unique product code of the user equipment; or an international mobile subscriber identity (IMSI) code.
